

Hydroblaster™

Model 60/200E

High volume Dual De-Muck System

GENERAL SPECIFICATIONS AND USE

Heavy mud and dirt accumulations can be removed quickly with the Hydroblaster Demucking system. Water is fully recycled from your wastewater collection system. Just place our wastewater pickup (pumping) system in your sump. Water is automatically fed to the Demucking systems solids separation tank. Particulates, as low as 40 microns, will be removed before water is used by the pumping system. At a rate of 30 gallons per minute, from each gun, water is forced through an adjustable nozzle at 200 PSI allowing the operators to use a gentle fan or direct stream of water for heavy accumulations. Dozers, front end loaders, back hoes and all heavy equipment can be cleaned quickly with this system.

Standard equipment:

- NEMA 4X electrical enclosure
- push button on/off pump controls
- pressure gauge
- low intake water protection system
- automatic fresh water makeup and pump bypass system

Choose your options (STD-designates the standard)

Electrical: Power & Controls

STD- 7.5 HP, 208-230/115 Volt, 3 Phase, Contactor & Overload

OPT- 7.5HP, 208-230/115 Volt, 1 Phase, Contactor & Overload

Electrical Options

STD- No fused disconnect

OPT- Fused Disconnect, 7.5HP, 208-230/115 Volt, 3 Phase

OPT- Fused Disconnect 7.5HP, 208-230/115 Volt, 1Phase

Mounting Options

STD- Stand, for Single Pump W/Electrical Mount

OPT- System Skid Mounting

Drain Line Configuration

STD- Stand Alone Sludge/Drain Line

OPT- Common Sludge/Drain Return Line

OPT- Drain Line For Skid Mounting

Discharge Options

STD- Discharge Hose, 50', 2 Each

OPT- Discharge Hose, 100', 2 Each

Hose Reel Options

STD- No Hose Reel

OPT- Hose Reel, Wall Mount, 100' Capacity, 2 Each

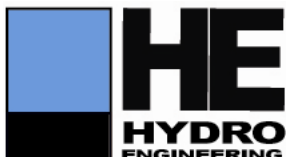

OPT- Hose Reel, Skid Mount, 100' Capacity, 2 Each

Inlet Options

STD- No Inlet Sump Pump, 3" FPT Inlet Port

OPT- Single Inlet Pump, 1/3 HP, Stainless Steel

OPT- Dual Inlet Pumps, 1/3 HP, Stainless Steel
