

# Hydropad Wash Racks

## **Equipment, not a Construction Project**

The Hydropad wash rack is your transportable solution for responsibly capturing wash water, wastewater, and contaminants. These pads are ideal for temporary or remote environments where mobility is essential or for established locations creating a permanent wash rack. Each Hydropad is designed to suit the needs of your unique situation; whether it's for reclaiming the wash water from your vehicles, equipment, and components, or ensuring that contaminants do not leave the job site on your transportation, Hydro Engineering Inc. has the solution for you.

Hydropads can be configured to connect either end-to-end or side-to-side in order to accommodate the wash rack size that works for your requirement. Let us help you with design requirements for your Hydropad wash rack that can include: Hydropads, gutters, entry and exit ramps, and walls. Our engineering department can provide 3-D renderings based on your design request.
