

Hydropad

8X14 Foot Wash Rack

The Hydropad Portable Wash Rack is an all steel above ground platform designed to collect water and solids from washing processes. The collected effluent is then diverted to the Hydropad's gutter system where solids/liquid separation occurs. Collected fluid is discharged for recycling back to the wash process, or to any discharge point. Solids are collected in the side gutter for disposal where they can be manually removed or automatically removed via a drag conveyor or skid steer drive in tray. Multiple Hydropads can be connected linked side to side and end to end with other Hydropads to create any desired size of Wash Rack. The increased flexibility and weight loading capacity of a Hydropad make them a much better option than a concrete wash pad.

Standard Features

- Safety Rail Non-Slip Surface
- Patented Side Gutter
- Bolt Together For Any Width Or Length Wash Rack Requirements
- 8' Length
- Forklift Access Points

Optional Features

- [Wash Rack Walls](#)
- [Drive On/Off Ramps](#)
- [Rain Tarp](#)
- [Gutter Drag Conveyor](#)
- [Skid Steer Drive In Clean Out Tray](#)
