2ZV237
Drive-In Clean Out Tray

The model 2ZV237 Drive-in Tray is a heavy-duty solid settling system. Wash water flows from the Hydropad above ground steel containment wash rack’s side gutter into the Drive-in Tray by gravity. Weirs located in the tray quiet the fluid flow which promotes solids settling. Clarified wash water enters the integral sump tank where it is discharged by a pump. When solids accumulate in the bottom of the tray, a skid-steer is used to remove them. Ideal for operations with a lot of heavy soil loads.

**Standard features:**
- 6’ wide X 12’ Long

**Optional features:**
- 6’ wide X 20’ Long Extended Length Tray
- Discharge pump, ½ HP, 120-volt, 1 phase, 60 HZ
- Discharge pump, ½ HP, 220-volt, 1 phase, 50 HZ
- Access Ramps
- Drive-In Tray Splash Guard
- Drive-In Tray Weir
