

# Hydromat Wash Mats

## Wash Water Containment Mat

Constructed using the best available heavy weight (35 ounce) fabric and vinyl coating. This combination makes Hydromat extremely tough and resistant to tearing and abrasion. Select either air berms with a 12 volt rechargeable pump to inflate and deflate, or foam insert berms. A surface level fluid skimming pump is placed in a low spot that serves as the fluid collection point.

Optional track mats can be lined up with tire tracks of vehicles that will drive over Hydromat. When placed over and under Hydromat, abrasion resistance of Hydromat containment system is substantially improved.

Available with Widths between 10ft - 35ft and Lengths of 12ft - 50ft

**Recycle 100% of All Water Captured!**
