

# RST

## 210/Gallon Capacity Configuration

The RST can be an essential option to a Hydrokleen water filtration and recycling system when an available sewer discharge is not available. Hydrokleen water filtration and recycling systems have a function for automatic discharge to drain. This auto discharge occurs when the system has overfilled with water. If there is no available source for discharge of water, the RST becomes that discharge location. The collected water in the RST then becomes the first source for make up water back to the Hydrokleen system.

### Standard Features

Gravity Flow Through Design  
Self-cleaning Tank  
Overflow Protection with Manual Drain Valve

### Optional Features

Rotating Beacon for Overfill Warning  
Auto Drain Valve  
PLC Controls  
Auto Pump-out to Auxillary System

### Specifications

Flow Rate - GPM (LPM)  
Filtration Accuracy  
Dimensions, Inches (cm) 34.5" (87.6) L X 34.5" (87.6) W X 96" (243.8) H  
Weight, Lbs (kg) 550 (249.5)

	Standard
Volts (60Hz)	115V-1P
Amps (60Hz)	15
