

# Catwalk – 10' High Elevated Platforms

## Model 3RH770-1

When your job requires an elevated work platform, especially for access to operator stations around the perimeter of a Hydropad wash rack, a Hydro Engineering Inc. catwalk is an excellent choice. Systems are available with a variety of wash station options that provide remote control of washing systems and a wide array of wash tools including monitors for high volume de-mucking applications.

Work platforms conform to OSHA standards.

### Standard Features

- Platform height is 10'
- Platform width is 3'
- All components galvanized

### Options

- 10' L X 3'W (select 1)
- 20' L x 3' W (select up to 5)
