

# Disinfectant Application System<sup>®</sup>

## Instant Vehicle Bio-Security

Hydro Engineering Inc's portable and affordable Disinfectant Application System (DAS<sup>®</sup>), is the best available technology for bio-security protection. This engineered equipment package comes factory tested and requires minimal assembly. All disinfectant collected on the Hydropad is recycled. The all weather design allows for operation in any environment 365 days a year.

- Disinfect all surfaces of a tractor trailer rig in less than one minute and up to 50 rigs per hour!  
Continuous duty rated!
- Robust and compact
- Quick and easy to set up, the system is pre-assembled and factory tested
- Insulated and heated enclosures provided for equipment, tools and disinfectant concentrate storage
- Automatically recycles all disinfectant collected on the Hydropad
- Cold weather operation is improved by heating the wash platform to prevent freezing and automatically draining all fluid piping after each application cycle
- Disinfectant mix ratios are user selectable and automatically maintained. System is 100% compatible with all USDA approved disinfectants
- Push button on/off control of the upper spray arches is provided at the entry
- High visibility stop light helps control entry to the system
- Utility requirements; 230/220V - 60/50hz - 1P/20A power, LP gas and fresh water
