

Festoon – Hose Handling

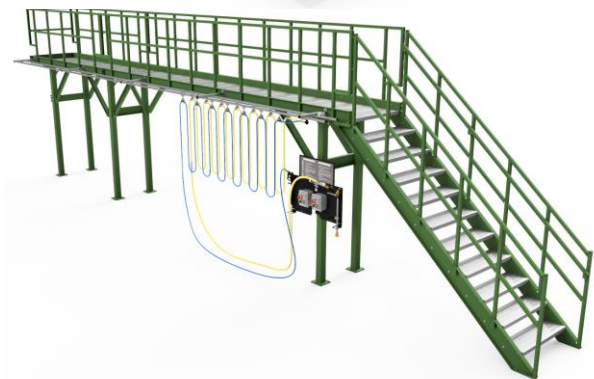

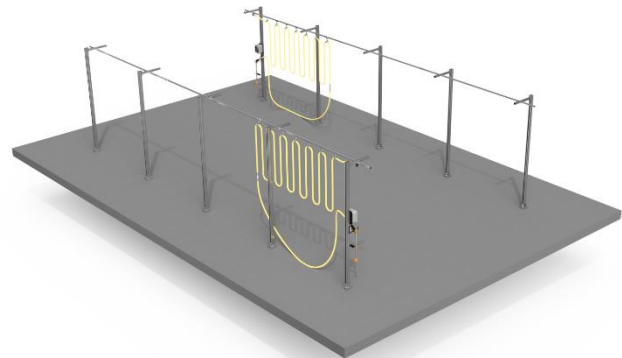

Model 5UG061

The festoon system is designed to safely support and manage high-pressure hoses, including water cannon and foam application lines, in demanding industrial wash down environments.

Our engineered festoons accommodate floor, wall, catwalk, or Hydropad mounting configurations. These designs provide reliable hose support, controlled movement, and ease of maintenance, with provisions for secure attachment, proper hose spacing, and long service life under repeated use.
