

Mobile Watercraft Decontamination System

Hydroblaster Decontamination & Reclaim, Trailer Mounted

Hydro Engineering, Inc. offers proven Hydroblaster decontamination system technology for watercraft in a variety of mobile configurations to fulfill any requirement for temporary or portable application. Model 5/3000GHO-WDS shown on right is used with Hydromat wastewater collection to ensure full environmental compliance preventing discharge of toxic waste. Hydroblaster innovations combine over 16-years of AIS specific wisdom to provide tools, equipment, training and best systems support. This means Best Available Technology for prevention program success. Only Hydro Engineering, Inc. understands and employs necessary requirements of science for real world applications and safety.

Hydroblaster GHO-WDS is the most advanced and effective watercraft decontamination system available. Features provide simplicity, efficiency, convenience, maximum safety, with ultimate performance for unparalleled real world application compensation. In combination, Hydromat wastewater collection assures simple and portable environmental compliance.

Precision Thermal Management (PTM) is available with every Hydroblaster decontamination system. PTM provides discharge temperature control of +/-1 degree F. with digital readout. This is a very critical innovation for operational convenience, watercraft safety, and effective results.

What is your waterway worth?

Hydroblaster solutions can help ---

1. Specifications are effective 2017. 2. Specifications are subject to change without notice

Certified Systems Available

Watercraft Decontamination Systems, Consulting, & Training

Hydro Engineering Inc, Pioneers of Prevention Technologies, Can Provide:
