

1YJ090 REM

Remote Equipment Module

Hydro Engineering Inc 1YJ090 Remote Equipment Module allows complete remote operation of Hydroblaster high-pressure hot water systems, Hydrofoamer soap application systems and Demucker water cannon systems.

1YJ090 Remote Equipment Modules are available in two (2) basic configurations.

- Wall Mount REM
- Pedestal Mount REM

Wall Mount REM

Designed similar to the pedestal mount REM, the Wall Mount REM includes all REM components and systems mounted on a backboard frame. Design allows direct mounted of entire REM frame on any wall or other vertical surface. System can be positioned at any location and connected to Hydroblaster process connections.

Pedestal Mount REM

This freestanding configuration incorporates all components and systems of the REM on a backboard frame. The rugged frame construction pedestal base floor mounts at the design location to mate with Hydroblaster process connections.

Optional features:

- Wall mount backboard
- Pedestal mounting for floor or Hydropad installation
- Remote start/stop stations for Hydroblaster pressure washers, Hydrofoamer and Demucker water cannons
- Hose reels; manual, self retract, air or electric retractable
- Gun/wand holsters

Both pictures show 1YJ090 with options:

- Backboard
- Start stop stations for Hydroblaster
- Retract hose reels
- Gun/wand and holsters
